

Thin cut-off wheels from PFERD
The perfect tool for any application

**YOU KNOW HOW.
WE KNOW
WOW!**

TRUST BLUE

- The perfect cut-off wheel product range for professional users
- Fast, thin cuts with minimized burr formation
- Maximum tool life, maximum efficiency, unparalleled cutting comfort

The perfect tool
for any application!

**YOU KNOW HOW.
WE KNOW WOW!**

You are the professional!

You excel when it comes to the cutting and processing of surfaces. With PFERD your results will be even better. With individual advice and the innovative tools from PFERD, you will bring the wow factor to your work results, economic efficiency and ergonomics.

Discover our product range with thin cut-off wheels for industrial users now.

Thin cut-off wheels from PFERD

The perfect tool for any application

Thin cut-off wheels

Workers all over the world Trust Blue and choose the thin cut-off wheels from PFERD. The PFERD product range includes thin cut-off wheels in various designs and therefore the right tool solution for any application – ergonomically optimized, efficient and with the highest level of safety. The thin cut-off wheels from PFERD are characterized by their special bond formulation. Intensive research, development and targeted implementation in state-of-the-art production facilities guarantee the premium quality and high safety standards of PFERD.

Advantages:

- Thin cuts with minimized burr formation.
- Maximum efficiency thanks to fast cutting and longest tool life.
- Convenient and safe.

Applications:

- Cutting of sheet metal
- Cutting of profiles and solid material
- Cutting out holes

PFERDVALUE:

PFERDERGONOMICS recommends using thin cut-off wheels in order to sustainably reduce the vibration, noise and dust that arise during use and improve working comfort.

PFERDEFFICIENCY recommends using thin cut-off wheels to achieve perfect results in no time.

Cut-off wheel width selection

Diameter 76–125 mm			PFERDVALUE
Thin cut-off wheels	0.8 mm	Maximum precision and cutting quality for sheet metal work	
	1.0 mm	Universal width with a focus on speed, comfort and cutting quality. Ideal for thin sheets and profiles with thin walls.	
	1.3 and 1.6 mm	Universal width with a focus on tool life and comfort. Ideal for profiles and solid material.	
Cut-off wheels	≥ 1.9 mm	Heavy-duty use	-
Diameter 150–230 mm			PFERDVALUE
Thin cut-off wheels	≤ 2.0 mm	Universal width with a focus on speed, comfort and cutting quality	
	2.5 mm	Universal width with a focus on tool life and comfort	
Cut-off wheels	≥ 2.9 mm	Heavy-duty use	-

PFERD offers a wide range of cut-off wheels with diameter 30–230 mm and stationary cut-off wheels up to 2,000 mm. All tools and more information at www.pferd.com.

Thin cut-off wheels from PFERD

The perfect tool for any application

Quality

All PFERD tools are developed, manufactured and tested in accordance with the strictest quality requirements. As a founding member of the "Organization for the Safety of Abrasives (oSa)", PFERD has committed to conform to tougher inspection requirements that even go beyond EN 12413 and EN 13743.

PFERD quality management is certified according to ISO 9001.

Product lines and colour coding

Universal Line PSF ★★☆☆

The entry-level range Universal Line PSF includes **robust tools** for processing the **most common materials**. Universal Line PSF tools achieve **good results** with **high economic efficiency**.

Performance Line SG ★★★☆

The broad Performance Line SG range offers a **high-performance tool solution for every application and every material**. Performance Line SG tools achieve **optimum results** with **maximum economic efficiency**.

Special Line SGP ★★★★★

Special Line SGP tools are specially developed for **specific tasks** and offer the user **key advantages over conventional products**. Furthermore, the Special Line SGP includes tools that, due to their particularly high performance during use, offer **ultimate economic efficiency**.

Materials and colour coding

Steel, cast steel	Steels up to 1,200 N/mm ² (< 38 HRC)	Construction steels, carbon steels, tool steels, non-alloyed steels, case-hardened steels, cast steel, alloyed steels															
	Hardened, heat-treated steels over 1,200 N/mm ² (> 38 HRC)	Tool steels, tempering steels, alloyed steels, cast steel															
Stainless steel (INOX)	Rust and acid-resistant steels	Austenitic and ferritic stainless steels, e.g. <table border="1"> <thead> <tr> <th>Names</th> <th>EN</th> <th>AISI</th> </tr> </thead> <tbody> <tr> <td>V2A</td> <td>1.4301</td> <td>304</td> </tr> <tr> <td>V2A</td> <td>1.4310</td> <td>301</td> </tr> <tr> <td>V4A</td> <td>1.4401</td> <td>316</td> </tr> <tr> <td>V4A</td> <td>1.4571</td> <td>316Ti</td> </tr> </tbody> </table>	Names	EN	AISI	V2A	1.4301	304	V2A	1.4310	301	V4A	1.4401	316	V4A	1.4571	316Ti

The perfect tool for any application

Label

oSa – Organization for the Safety of Abrasives

As a founder member of oSa, PFERD has voluntarily undertaken to produce quality tools conforming to the most exacting safety standards. Member companies of oSa are committed to continuous product safety and quality monitoring.

Safety information

Information on the safe use of grinding tools can be found in our Tool Manual 23, catalogue section 6, pages 7–8.

Expiry date and lot number

Material information

The bottom section of every label indicates the material or materials for which the tool is suitable.

Information bar

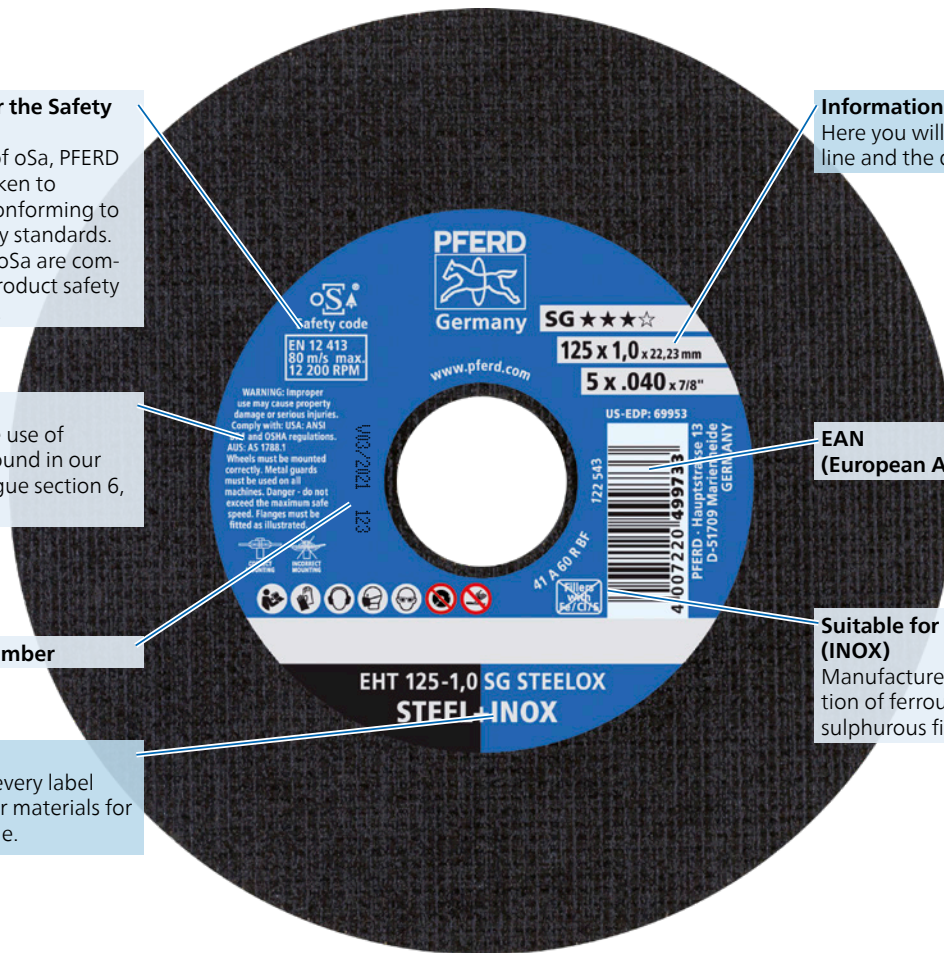

Here you will find the product line and the dimensions.

EAN

(European Article Number)

Suitable for stainless steel (INOX)

Manufactured without addition of ferrous, chlorinated or sulphurous fillers

Packaging

PFERD supplies cut-off wheels, flap discs and grinding wheels in robust industrial packaging that protects the tools against damage. All important technical and ordering information can be found on the packaging label.

Thin cut-off wheels from PFERD

Universal Line PSF ★★☆☆

PSF STEEL ★★☆☆

Cut-off wheel for steel with high cutting performance and long tool life.

Advantages:

- Fast work progress thanks to high cutting performance.
- High economic efficiency due to long tool life.

Materials that can be worked:

steel

Applications:

cutting of sheet metal, profiles and solid material, cutting out holes

Abrasive:

Aluminium oxide A

PFERDVALUE:

Universal Line PSF ★★☆☆

PSF STEELOX ★★☆☆

Cut-off wheel for steel and stainless steel (INOX) with high cutting performance and long tool life.

Advantages:

- Universally suitable for steel and stainless steel (INOX).
- Fast work progress thanks to high cutting performance.
- High economic efficiency due to long tool life.
- Thin cut-off wheels are ideal for cordless angle grinders.
- X-LOCK type: for comfortable and quick tool changes.

Applications:

cutting of sheet metal, profiles and solid material, cutting out holes

Abrasive:

Aluminium oxide A

Thin cut-off wheels from PFERD

Universal Line PSF ★★☆☆

PSF ALU + STONE ★★☆☆

Cut-off wheel for non-ferrous metals and mineral materials with high cutting performance and long tool life.

Advantages:

- Fast work progress thanks to high cutting performance.
- High economic efficiency due to long tool life.
- Width of 1.0 mm is also ideal for cordless angle grinders.

Materials that can be worked:

aluminium, titanium, other non-ferrous metals, stone, concrete, tiles, duroplastics, fibre-reinforced duroplastics (GRP, CRP), cast iron

Applications:

cutting of sheet metal, profiles and solid material, cutting out holes

Abrasive:

Silicon carbide C

SG ALU ★★☆☆☆

Cut-off wheel for aluminium and other non-ferrous metals with high cutting performance and very long tool life.

Advantages:

- Special abrasive mixture and bond technology prevent the cut-off wheel clogging up, even on soft, tough aluminium.
- Fast work progress thanks to high cutting performance.
- Maximum economic efficiency due to very long tool life.
- Contains no fillers that could leave undesirable residues on the workpiece. The surface can therefore be welded immediately.

Materials that can be worked:

aluminium, other non-ferrous metals

Applications:

cutting of sheet metal, profiles and solid material, cutting out holes

Abrasive:

High-performance aluminium oxide A and silicon carbide C

Thin cut-off wheels from PFERD

Special Line SGP ★★★★★

CERAMIC

Special cut-off wheel with ceramic oxide grain for steel with ultimate cutting performance and outstanding tool life. Optimized for use on steel workpieces with larger cross sections.

Advantages:

- Unprecedented cutting performance due to high-performance abrasive ceramic oxide grain in connection with a special bond technology, resulting in the fastest work progress even on large cross sections.
- Maximum efficiency due to excellent tool life.

CERAMIC SGP STEEL ★★★★★

Materials that can be worked:

Thin cut-off wheels from PFERD

NITOCUT cutting system

NITOCUT

NITOCUT is the first manual cutting system in the world for a peripheral speed of 100 m/s. The cut-off wheel developed by PFERD is characterized by its top cutting performance and outstanding tool life. The NITOCUT cutting system allows faster working and up to four times more cuts as well as a higher insertion depth than the cut-off wheels common on the market with the dimensions 125 x 1.0 mm. The unique cutting system meets the highest quality and safety standards.

Advantages:

- Ultimate cutting performance and tool life due to significantly increased cutting speed.
- High insertion depth.
- Unique, convenient cutting experience.
- Extremely high cut-off wheel reliability thanks to innovative fibreglass reinforcement.

Recommendations for use:

- The 100 m/s cutting system can be used like any conventional angle grinders.

Safety notes:

- Common cut-off wheels achieve a peripheral speed of a maximum of 80 m/s. They must not be used on the NITOCUT angle grinder.
- In order to prevent misuse, the specially produced angle grinder only allows the assembly of NITOCUT cut-off wheels.

PFERDVALUE:

PFERDERGONOMICS recommends the NITOCUT cutting system in order to sustainably reduce the vibration, noise and dust development that result during use and improve working comfort.

PFERDEFFICIENCY recommends the NITOCUT cutting system for working for long periods with low levels of fatigue, whilst saving resources and achieving perfect results as quickly as possible.

Additional fibreglass reinforcement in the flange area

Thin cut-off wheels from PFERD

NITOCUT cut-off wheel – Special Line SGP ★★★★★

CERAMIC SGP NITOCUT STEELOX ★★★★★

High-performance cut-off wheel for steel and stainless steel (INOX) with ultimate cutting performance and an excellent tool life.

Thin cut-off wheels from PFERD

Special Line SGP ★★★★★

SGP STEELOX ★★★★★

Cut-off wheel for steel and stainless steel (INOX) with high cutting performance and an excellent tool life. Specially optimised for use on thin sheets and profiles.

Materials that can be worked:
steel, stainless steel (INOX)

Applications:
cutting of thin sheet metal and profiles,
cutting out holes

Abrasive:
High-performance aluminium oxide A

PFERDVALUE:
Thin cut-off wheels:

Advantages:

- Excellent tool life on thin sheet metal and profiles thanks to wear-resistant bond system.
- Universally suitable for steel and stainless steel (INOX).
- Fast work progress thanks to high cutting performance.

Clamping flanges

Clamping flange set for thin 180/230 mm cut-off wheels

Clamping flange set for increasing lateral stability and precise guidance, especially when using cut-off wheels from 1.6 to 2.0 mm in width with diameters of 180 and 230 mm. The set can be used with any standard angle grinder with an M14 or 5/8"-11 drive spindle.
